WD-C7808

Facial Recognition Thermometer

Product description

WD-C7808

Body Temperature Measurement

Facial Recognition

Two Major Functions for Flexible Choice

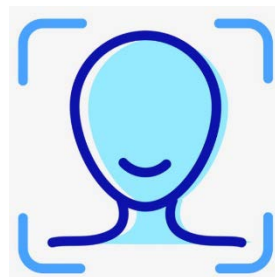

Product description

Multiple AI Technology

Application Mode

End User information upload scenario

1 Photo collection

Selfie or existing photo

Upload

Computer

2 Information release

Computer

Transfer via USB flash drive

Equipment

End User information upload scenario

3 Equipment usage

Allow to pass

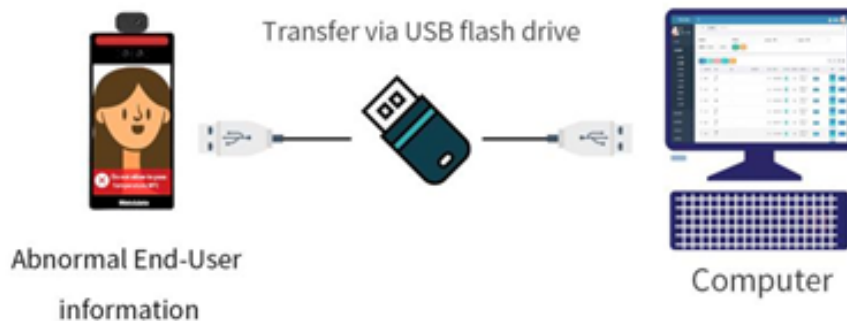

normal circumstances

End-User photo Stored
Simultaneous alarm

abnormal circumstances

4 Import abnormal information to computer

Technical Specifications

Main board	CPU: 4-core 1.8 GHZ, memory: 2G internal storage, 8G storage space
Operating system	Android 5.1
Camera	Binocular+ RGB infrared+ 850nm +wide dynamic+2 million px
Recognition distance	0.4~0.7 meters
Recognition time	0.5 second
Recognition rate	> 99.7%
Display	8 inch full viewing angle, 700cd brightness
Operating temperature	-20°C~70 °C
Working humidity	10%~90%
Power	DC 12 V IN
Power Consumption	18 W MAX
Installation method	Wall / gate / desktop
Dimension	240(H)*123 (W)*19.5 (T) mm
Weight	1450g

Application Scenario

For security, Always Watchdata
